PROJECTS

DG Cranking System (01/2021 - 06/2021)

- This project was made with a team in which instead of using Diesel as a fuel, we substituted the energy supply system with 12V Batteries and Supercapacitors.

Line Following Robot (07/2021 - 12/2021)

- This project was made with a team to create a solution in which using different sensors, robotic devices like cars and vehicles can be made, who run on automation following a certain path. This technology can be very helpful in logistics industry.
